

ROTO-TABLE : Cyclo Dispenser Model 7350-R

The cyclo dispenser 7350-R, with its versatile and easy-to-use design, is perfectly suited to assure the accurate deposits, dots or beads, Low or high-viscosity fluid could be used with it.

The unique instruction ability can help user determine the proper adhesive amount, and remember the required adhesive output time; therefore it can provide the consistent adhesive output amount.

The great quality and repeatability of 7350-R dispenser is adapted for long term usage

- ✓ suited for all liquids
- ✓ adjustable dispensing time ahead or behind
- ✓ equipped with SMC twin-bar cylinder to keep machine working fast and stable and avoid mechanical tolerance
- ✓ equipped with X-Y fine-tuning board for precise positioning and frequent setting
- ✓ precise stepping motor to control dispensing speed
- ✓ built-in dispensing controller, no external controller required
- ✓ optional magnetic switch or optoelectronic switch for easier operation
- ✓ vacuum suck-back ability effectively controls thin fluid and avoids leakage
- ✓ microcomputer control/real-time digit display
- ✓ unique instruction ability
- ✓ one-year free warranty

Specification:

Size (L*W*H) 310mm x 215mm x 85mm
 Input voltage AC220V±10 50HZ / AC110V±10 60HZ
 Capacity 50W
 Motor speed 0~300r/minute
 Air source >0.3Mpa (clear and dry air)
 Drive mode precise stepping motor
 Tactical diameter 0~145
 External controller any kind of PDS controller
 Mechanical repeatability precision ±0.01mm
 Minimum output amount 0.0001ml
 Weight 7kg
